JURA C8 Piano Black (EA) Kavos aparatas

Pure indulgence The CB is compact in size, but serves a top-class coffee. Thanks to the full-size brewing unit with variable brewing chamber, which has a holding capacity of 5 to 16 g, the CB captures the full extent of all coffee aromas in just the one cup. The Pulse Extraction Process (PEP^{*}) ensures every expresse is perfectly served to baricas tandard, while there is also room to ad your own personal twist with individual settings for consistency of grind and quantities of water and milk. With the two-cup function, it is possible to prepare two cups of espresso or coffee at the same time - perfect for those shared coffee moments.

Fine milk foam at the touch of a button Airy mik foam allows the flavour of a latte macchiato to unfold or adds that perfect finish to a cappuccino. The GB prepare these two classics with milk foam freat at the touch of a button, offering uncompromising quality. The fine foam technology, which forths the milk twice in two separate chambers, creates the lightweight texture and a very special type of milk foam.

Sophisticated, compact design Inspired by our premium segment, the CB boasts a sophisticated and timeless wave design: curved structures characterise the water tank and emphasise the chrome cup grille. The momentum of the waves is continued on the convex-concast front, capturing the CB's design language in one compact unit. Boasting a clear design and unconventional simplicity, the CB achieves impressive performance in a compact format.
